CONTENTS OF VOLUME 24

Articles

AKAHIRA, MASAFUMI AND SATO, MICHIKAZU. An information inequality for the Bayes risk 2288–2295

AMIT, YALI. Convergence properties of the Gibbs sampler for perturbations of Gaussians 122–140

ANDERSON, T. W. Some inequalities for symmetric convex sets with applications 753–762

ARCONES, MIGUEL A. The Bahadur–Kiefer representation for U-quantiles 1400–1422

ATHREYA, KRISHNA B., DOSS, HANI AND SETHURMAN, JAYARAM. On the convergence of the Markov chain simulation method ... 69–100

BARTOSZYŃSKI, ROBERT, MAA, JEN-FUE AND PEARL, DENNIS K. Reducing multidimensional two-sample data to one-dimensional interpoint comparisons 1069–1074

BEDNARSKI, TADEUSZ AND ZONTEK, STEFAN. Robust estimation of parameters in a mixed unbalanced model 1493–1510

BEIBEL, M. A note on Ritov's Bayes approach to the minimax property of the cusum procedure 1804–1812

BERAN, RUDOLF, FEUERVERGER, ANDREY AND HALL, PETER. On nonparametric estimation of intercept and slope distributions in random coefficient regression 2569–2592

BERGER, JAMES O. AND STRAWDERMAN, WILLIAM E. Choice of hierarchical priors: Admissibility in estimation of normal means 931–951

BERK, R. H., NOGALES, A. G. AND OYOLA, J. A. Some counterexamples concerning sufficiency and invariance 902–905

BERTI, PATRIZIA AND RIGO, PIETRO. On the existence of inferences which are consistent with a given model 1235–1249

BETENSKY, REBECCA A. An O'Brien–Fleming sequential trial for comparing three treatments 1765–1791

BOSE, ARUP AND BOUKAI, BENZION. Estimation with prescribed proportional accuracy for a two-parameter exponential family of distributions 1792–1803

BOUKAI, BENZION AND BOSE, ARUP. Estimation with prescribed proportional accuracy for a two-parameter exponential family of distributions 1792–1803

BREIMAN, LEO. Heuristics of instability and stabilization in model selection 2350–2383

BROWN, LAWRENCE D. AND LOW, MARK G. A constrained risk inequality with applications to nonparametric functional estimation 2524–2535

BROWN, LAWRENCE D. AND LOW, MARK G. Asymptotic equivalence of nonparametric regression and white noise 2384–2398

CABAÑA, ALEJANDRA. Transformations of the empirical measure and Kolmogorov–Smirnov tests 2020–2035

CASALIS, M. AND LETAC, G. The Lukacs–Olkin–Rubin characterization of Wishart distributions on symmetric cones 763–786
CASALIS, MURIEL. The $2d + 4$ simple quadratic natural exponential families on $\mathbb{R}^d$. 1828–1854
CHANDA, KAMAL C. Asymptotic properties of estimators for autoregressive models with errors in variables 423–430
CHEN, HEGANG AND HEDAYAT, A. S. 2^{n-l} designs with weak minimum aberration. 2536–2548
CHEN, KANI AND LO, SHAW-HWA. On bootstrap accuracy with censored data 569–595
CHEN, KANI AND YING, ZHILIANG. A counterexample to a conjecture concerning the Hall-Wellner band 641–646
CHOI, SUNGSUB, HALL, W. J. AND SCHICK, ANTON. Asymptotically uniformly most powerful tests in parametric and semiparametric models 841–861
CIFARELLI, DONATO MICHELE, CONTI, PIER LUIGI AND REGAZZINI, EUGENIO. On the asymptotic distribution of a general measure of monotone dependence 1386–1399
COAKLEY, CLINT W. AND MILI, LAMINE. Robust estimation in structured linear regression 2593–2607
COHEN, ARTHUR AND SACKROWITZ, H. B. Cone order association and stochastic cone ordering with applications to order-restricted testing 2036–2048
CONTI, PIER LUIGI, REGAZZINI, EUGENIO AND CIFARELLI, DONATO MICHELE. On the asymptotic distribution of a general measure of monotone dependence 1386–1399
CSÖRGŐ, MIKLÓS AND ZITIKIS, RIČARDAS. Mean residual life processes 1717–1739
CSÖRGŐ, SÁNDOR. Universal Gaussian approximations under random censorship 2744–2778
DAHLHAUS, R. AND JANAS, D. A frequency domain bootstrap for ratio statistics in time series analysis 1934–1963
DAHLHAUS, R. AND WEFELMEYER, W. Asymptotically optimal estimation in misspecified time series models 952–974
DATTA, GAURI SANKAR AND GHOSH, MALAY. On the invariance of noninformative priors 141–159
DETTE, HOLGER. A note on Bayesian c- and D-optimal designs in nonlinear regression models 1225–1234
DETTE, HOLGER AND WONG, WENG KEE. Optimal Bayesian designs for models with partially specified heteroscedastic structure. 2108–2127
DEVROYE, LUC AND LUGOSI, GÁBOR. A universally acceptable smoothing factor for kernel density estimates 2499–2512
DONOHO, DAVID L., JOHNSTONE, IAIN M., KERKYACHARIAN, GÉRARD AND PICARD, DOMINIQUE. Density estimation by wavelet thresholding 508–539

DOSS, HANI, SETHURMAN, JAYARAM AND ATHREYA, KRISHNA B. On the convergence of the Markov chain simulation method ... 69–100
DUCHAMP, TOM AND STUETZLE, WERNER. Extremal properties of principal curves in the plane ... 1511–1520
EFROMOVICH, SAM. On nonparametric regression for iid observations in a general setting ... 1126–1144
EFROMOVICH, SAM AND LOW, MARK. On Bickel and Ritov's conjecture about adaptive estimation of the integral of the square of density derivative ... 682–686
EFROMOVICH, SAM AND LOW, MARK. On optimal adaptive estimation of a quadratic functional ... 1106–1125
EFRON, BRADLEY AND TIBSHIRANI, ROBERT. Using specially designed exponential families for density estimation ... 2431–2461
ERICKSON, R. V. Robust estimation of the location of a vertical tangent in distribution ... 1423–1431
EVANS, STEVEN N. AND STARK, PHILIP B. Shrinkage estimators, Skorokhod's problem and stochastic integration by parts ... 809–815
FAKHRE-ZAKERI, ISSA AND SLUD, ERIC. Optimal stopping of sequential size-dependent search ... 2215–2232
FANG, KAI-TAI AND ZHU, LI-XING. Asymptotics for kernel estimate of sliced inverse regression ... 1055–1068
FEUERVERGER, ANDREY AND HALL, PETER. On distribution-free inference for record-value data with trend ... 2655–2678
FEUERVERGER, ANDREY, HALL, PETER AND BERAN, RUDOLF. On nonparametric estimation of intercept and slope distributions in random coefficient regression ... 2569–2592
GAMBOA, F. AND GASSIAT, E. Blind deconvolution of discrete linear systems ... 1964–1981
GARDINER, JOSEPH C. AND WANG, ZHIMING. A class of estimators of the survival function from interval-censored data ... 647–658
GASSIAT, E. AND GAMBOA, F. Blind deconvolution of discrete linear systems ... 1964–1981
GHOSH, MALAY AND DATTA, GAURI SANKAR. On the invariance of noninformative priors ... 141–159
GOLDSTEIN, LARRY AND GORDON, LOUIS. Asymptotics for the maximum of half-normal plots ... 2250–2265
GORDON, LOUIS AND GOLDSTEIN, LARRY. Asymptotics for the maximum of half-normal plots ... 2250–2265
GÖTZE, F. AND KÜNSCH, H. R. Second-order correctness of the blockwise bootstrap for stationary observations ... 1914–1933
GOUTIS, CONSTANTINOS. Partial least squares algorithm yields shrinkage estimators ... 816–824
GREENSHTEIN, EITAN. Comparison of sequential experiments ... 436–448
GREENWOOD, PRISCILLA E., MCKEAGUE, IAN W. AND WEFELMEYER, WOLFGANG. Outperforming the Gibbs sampler empirical estimator for nearest-neighbor random fields ... 1433–1456

GRÜBEL, RUDOLF. Orthogonalization of multivariate location estimators: The orthomedian 1457–1473
GRUET, MARIE-ANNE. A nonparametric calibration analysis 1474–1492
GUSTAFSON, PAUL. Local sensitivity of posterior expectations . . . 174–195
GYÖRFI, LÁSZLÓ, MORVAI, GUSZTÁV AND YAKOWITZ, SIDNEY. Nonparametric inference for ergodic, stationary time series 370–379
HALL, PETER AND FEUERVERGER, ANDREY. On distribution-free inference for record-value data with trend 2655–2678
HALL, PETER AND POLZEHL, JÖRG. On the dimension of the boundary of clumps in a multi-type Boolean model 1521–1535
HALL, PETER, BERAN, RUDOLF AND FEUERVERGER, ANDREY. On nonparametric estimation of intercept and slope distributions in random coefficient regression 2569–2592
HALL, PETER, MCKAY, IAN AND TURLACH, BERWIN A. Performance of wavelet methods for functions with many discontinuities 2462–2476
HALL, W. J., SCHICK, ANTON AND CHOI, SUNGSUB. Asymptotically uniformly most powerful tests in parametric and semiparametric models 841–861
HARTIGAN, J. A. Locally uniform prior distributions 160–173
HE, XUMING AND SHAO, QI-MAN. A general Bahadur representation of M-estimators and its application to linear regression with nonstochastic designs 2608–2630
HE, ZHUOQIONG, STUDDEN, WILLIAM J. AND SUN, DONGCHU. Optimal designs for rational models 2128–2147
HEALY, DENNIS M., JR. AND KIM, PETER T. An empirical Bayes approach to directional data and efficient computation on the sphere 232–254
HEDAYAT, A. S. AND CHEN, HEGANG. 2^{n-l} designs with weak minimum aberration 2536–2548
HESS, CHRISTIAN. EPI-convergence of sequences of normal integrands and strong consistency of the maximum likelihood estimator 1298–1315
HJORT, N. L. AND JONES, M. C. Locally parametric nonparametric density estimation 1619–1647
HO, HWAI-CHUNG AND HSING, TAILEN. On the asymptotic expansion of the empirical process of long-memory moving averages 992–1024
HOLLANDER, MYLES, MCKEAGUE, IAN W., YANG, JIE AND LI, GANG. Nonparametric likelihood ratio confidence bands for quantile functions from incomplete survival data 628–640
HOLMES, R. B. AND JONES, L. K. On uniform generation of two-way tables with fixed margins and the conditional volume test of Diaconis and Efron 64–68
HORVÁTH, LAJOS AND SHAO, QI-MAN. Limit theorem for maximum of standardized U-statistics with an application 2266–2279

HÖSSJER, OLA. Incomplete generalized L-statistics 2631–2654
HSIEH, FUSHING. Empirical process approach in a two-sample location–scale model with censored data 2705–2719
HSIEH, FUSHING AND TURNBULL, BRUCE W. Nonparametric and semiparametric estimation of the receiver operating characteristic curve 25–40
HSING, TAILEN AND HO, HWAI-CHUNG. On the asymptotic expansion of the empirical process of long-memory moving averages 992–1024
HUANG, JIAN. Efficient estimation for the proportional hazards model with interval censoring 540–568
HUANG, JIAN AND PRÆSTGAARD, JENS THOMAS. Asymptotic theory for nonparametric estimation of survival curves under order restrictions 1679–1716
HUGGINS, R. M. Robust inference for variance components models for single trees of cell lineage data 1145–1160
HUWANG, LONGCHEEN. Asymptotically honest confidence sets for structural errors-in-variables models 1536–1546
INGLOT, TADEUSZ AND LEDWINA, TERESA. Asymptotic optimality of data-driven Neyman's tests for uniformity 1982–2019
ISHWARAN, HEMANT. Identifiability and rates of estimation for scale parameters in location mixture models 1560–1571
ISHWARAN, HEMANT. Uniform rates of estimation in the semiparametric Weibull mixture model 1572–1585
JANAS, D. AND DAHLHAUS, R. A frequency domain bootstrap for ratio statistics in time series analysis 1934–1963
JIANG, JIMING. REML estimation: Asymptotic behavior and related topics 255–286
JING, BING-YI AND WOOD, ANDREW T. A. Exponential empirical likelihood is not Bartlett correctable 365–369
JOHNSTONE, IAIN M., KERKYACHARIAN, GÉRARD, PICARD, DOMINIQUE AND DONOHO, DAVID L. Density estimation by wavelet thresholding 508–539
JONES, L. K. AND HOLMES, R. B. On uniform generation of two-way tables with fixed margins and the conditional volume test of Diaconis and Efron 64–68
JONES, M. C. AND HJORT, N. L. Locally parametric nonparametric density estimation 1619–1647
KADANE, JOSEPH B. AND WASSERMAN, LARRY. Symmetric, coherent, Choquet capacities 1250–1264
KARIYA, TAKEAKI AND KURATA, HIROSHI. Least upper bound for the covariance matrix of a generalized least squares estimator in regression with applications to a seemingly unrelated regression model and a heteroscedastic model 1547–1559
KARUNAMUNI, ROHANA J. Optimal rates of convergence of empir-

ical Bayes tests for the continuous one-parameter exponential family 212–231
KENT, JOHN T. AND TYLER, DAVID E. Constrained *M*-estimation for multivariate location and scatter 1346–1370
KERKYACHARIAN, GÉRARD AND PICARD, DOMINIQUE. Estimating nonquadratic functionals of a density using Haar wavelets . . 485–507
KERKYACHARIAN, GÉRARD, PICARD, DOMINIQUE, DONOHO, DAVID L. AND JOHNSTONE, IAIN M. Density estimation by wavelet thresholding 508–539
KIM, PETER T. AND HEALY, DENNIS M., JR. An empirical Bayes approach to directional data and efficient computation on the sphere 232–254
KLEINBERG, E. M. An overtraining-resistant stochastic modeling method for pattern recognition 2319–2349
KLÜPPELBERG, CLAUDIA AND MIKOSCH, THOMAS. The integrated periodogram for stable processes 1855–1879
KOCH, INGE. On the asymptotic performance of median smoothers in image analysis and nonparametric regression 1648–1666
KOKONENDJI, CÉLESTIN C. AND SESHADRI, V. On the determinant of the second derivative of a Laplace transform 1813–1827
KOKOSZKA, PIOTR S. AND TAQQU, MURAD S. Parameter estimation for infinite variance fractional ARIMA 1880–1913
KOLASSA, JOHN E. Higher-order approximations to conditional distribution functions 353–364
KOROSTELEV, ALEXANDER. A minimaxity criterion in nonparametric regression based on large-deviations probabilities . . . 1075–1083
KOSTER, J. T. A. Markov properties of nonrecursive causal models 2148–2177
KOUL, HIRA L. Asymptotics of some estimators and sequential residual empiricals in nonlinear time series 380–404
KOUL, HIRA L. AND SCHICK, ANTON. Adaptive estimation in a random coefficient autoregressive model 1025–1054
KÜNSCH, H. R. AND GÖTZE, F. Second-order correctness of the blockwise bootstrap for stationary observations 1914–1933
KURATA, HIROSHI AND KARIYA, TAKEAKI. Least upper bound for the covariance matrix of a generalized least squares estimator in regression with applications to a seemingly unrelated regression model and a heteroscedastic model 1547–1559
LANG, JOSEPH B. Maximum likelihood methods for a generalized class of log-linear models 726–752
LAURENT, BÉATRICE. Efficient estimation of integral functionals of a density 659–681
LEDWINA, TERESA AND INGLOT, TADEUSZ. Asymptotic optimality of data-driven Neyman's tests for uniformity 1982–2019
LEE, SANGYEOL. Sequential estimation for the autocorrelations of linear processes 2233–2249
